Subject: VTGas Addison County pipeline

Dear PUC

I am writing to ask you to complete your investigation- case 17-3550-INV into safety violations of the pipeline. All these failures must be corrected or the CPG permit should be rescinded.

This must be done before you consider the NOPV case 18-0395-PET and the Monkton Gate station. These should not be reviewed until the pipeline has been made good in all areas. VGS should be held morally and financially responsible before new reviews start.

Thank you for your consideration

Victoria DeWind
