Please file my comments in the NOPV case(18-0395-PET), the Monkton Gate Station case (17-4909 PET) and the Investigation case (17-3550-INV).

There is a multitude of known and suspected serious safety risks and problems with this pipeline. A fine will not correct these. Demand that the construction issues be repaired or reopen the entire CPG permit.

Even now VT is not meeting its goals towards clean, renewable energy. This fossil fueled pipeline from fracked gas is of no help in our reaching our goals. The new customers VTGAS said were to sign onto their line have NOT appeared. Vermonters are aware of the additional costs for changing over. We are aware of the effect on our earth, water, health. Please shut it down.
