Subject: Vermont Gas Pipeline

Please investigate the documented non-compliance standards that have come forward regarding Vermont Gas Pipeline for both the NOPV case (18-0395-PET) and the currently pending case for the Monkton Gate Station (17-4909-PET). I believe that these cases should be put on hold until the investigation case (17-3550-INV) has done a thorough review of the safety violations. I have watched this construction from the beginning and have been disheartened by the company's lack of respect and responsibility. I think there are legitimate concerns regarding the safety of the construction of this pipeline and urge you to withdraw the Certificate of Public Good. Thank you

Sincerely,
Barbara Karle
